

10th ANNIVERSARY SHOWING - "ONE-SIX RIGHT"

The Romance of Aviation

If you think back to the earliest time in your life when airplanes and flying first got you excited, and if you remember your feelings of anticipation and excitement, you will relive them once again Wednesday night as CAPA has a tenth anniversary showing of the outstanding feature film dedicated to general aviation, Brian Terwilliger's "One-Six Right." As we begin to taste the smell of another new Spring and aviation on Cape Cod, we once again present this inspirational aviation film.

From Wikipedia:

One Six Right: The Romance of Flying is an *independent film* about

*the **general aviation** industry as seen through a local airport. Within a short period of time, it has achieved a passionate following and presence among pilots and aviation enthusiasts worldwide who see the film as being able to communicate their passion for aviation. Concurrently, the film has garnered both local and national political attention in the United States as an accurate depiction of general aviation and its important contributions to all aviation industries worldwide.*

*One Six Right considers local airports through the life, history and struggle of Southern California's **Van Nuys Airport**. Through aerial sequences and stories told by pilots, air traffic controllers, historians and flight enthusiasts, including well-known faces such as **Sydney Pollack, Lorenzo Lamas, Paul Moyer, Hal Fishman, Desiree Horton** and many others. The film uncovers the history of the airport where **Amelia Earhart** broke a world speed record over its runways, and where **Marilyn Monroe** was discovered while working in its hangars; scenes from **Casablanca** were filmed on the grounds.*

A historical perspective of airplanes from the 1920s to the business jets of today frames appreciation for the significance of all general aviation airports as a critical component of the communities they serve. Located in the heart of the San Fernando Valley, VNY is today the world's busiest general aviation airport and contributes over \$1 billion each year to the southern California economy.

One Six Right explores common misconceptions about general aviation airports, which are often criticized for noise pollution and viewed as exclusive playgrounds for the rich. The film creates an awareness of the threat to these community airports through staggering statistics of airports that no longer exist, and the rapid rate at which they are continuing to close: one per week in the U.S. These smaller and often forgotten airports are the foundation of the aviation industry, contributing to global commerce and the breeding ground of the pilots of tomorrow.

*One Six Right was exhibited to the **United States Congress** on Capitol Hill in Washington, D.C.*

In the ten years since the film's debut, the film has inspired many young people to become pilots: Here is one living his dream of actually landing on runway 16R at VNY.
